

Hilan Tech – Payroll System

> The Challenge

Educate the suppliers to electronically fill out the required forms instead of printing them, in order to report electronically to the tax authorities.

Background

Hilan Tech Ltd. is the leading ASP - Application Service Provider in Israel, for overall management of the human resources in the organization: payroll, human resources, time and attendance and pension administration.

The Solution

Implementing combined solutions of ComSignTrust Enterprise and ComSignTrust API and integrating the electronic signature into the customer's payroll system. Using SIGNER-1 appliance for multiple signatures enables huge quantity of documents from various suppliers to be signed in very short time. Each supplier fills out his forms electronically, the approver receives it and signs it electronically with his own certificate. The forms are legally signed and reported to the Ministry of Treasury.

The Results

- Reduced OPEX and CAPEX for each supplier.
- Avoidance of printing large quantities of documents
- Speed-up of internal approval processes
- Secure and legal document signing
- Smooth workflow between the suppliers and the Tax Authorities
