WeSign®
The Future

Digital signature portal for remote signing

www.comsigntrust.com

WeSign® The Future is a remote digital signature solution that enables you to sign any document at any time, from any device—whether it's a computer, cellphone, tablet, or desktop. WeSign streamlines the approval process, seamlessly facilitating interactions between departments and signatures, ensuring tasks are completed more efficiently.

Agile Solution

With Wesign you can sign documents digitally anytime, using any device: desktop computer, laptop, smartphone, or tablet

TAILOR MADE Solution

A flexible pricing model allows everyone to customize a convenient and affordable plan for themselves: self-employed individuals, small businesses, large companies, startups and organizations

Cloud Solution

This solution saves significant resources and eliminates the unnecessary headaches associated with additional software installations for storage and information security

Secure Solution

Rest assured that our team takes all necessary steps to ensure your security. Your data is encrypted, ensuring that signed documents are visible only to you.

Every business, small or large, whose customers and suppliers sign documents—whether a few per month or thousands—can benefit from a remote signing service for various needs, such as:

Documents of all Types	Contracts	Agreements	Internal Organizational Interfaces	Changes in Customer Status or Service
Contracts in various fields	Contracts in various fields	Employment contracts for new hires	Work orders	Modifying existing contracts
Supplier agreements	Supplier agreements, Customer contracts	Declaration of Income	Work proposals	Increasing work volume
Customer contracts			Confirmation of customer delivery	Termination of communication

Availability, Convenience and Simplicity with WeSign The Future

WeSign®
The Future

More than just an E-Signature

Sending a Document for signature

- Send documents for signature via link, email, SMS, or any other method of your choice
- Use online signature – remotely reviewing and completing the document with the signer
- System supports both individual and multiple signature processes with a defined signing order
- Offers the creation of reusable document templates
- Add notes to the document before sending for signature
- Consolidates multiple files into a single PDF for signature or as a permanent template
- Upload multiple files for signature
- Facilitates signatures on corporate tablets with document access
- Adapts to a variety of document formats, including PDF, Word-MS, JPEG, PNG, XLS, and more
- Video conference. Zoom can be launched as part of the signing process.

Document Editing

- Add the Drag & Drop method to insert edit and signature fields.
- Duplicate editing and signature fields effortlessly
- Customize branding – implementing a company logo and brand taglines.
- Attach additional files to the document

Document Signing

- Sign documents using three methods – drawing, a graphic signature, or initials
- Use a smart card or a token for certified signatures
- Save signatures for future use
- Comment on the document, both signer and sender

Security

- Use two-step verification links for signers
- Implement face recognition for a better authentication process before signing
- Use of SSO by connecting to AD for identifying users and recipients (including Azure AD).

Document Management and Tracking

- Manage and track document status
- Receive email notifications upon document signing or viewing by recipients
- Send automatic signature reminders to unsigned document recipients

Additional Options

- Enable API integration by interfacing with internal systems
- Attribute and send files automatically to designated fields and recipients
- Circulate documents, such as the Declaration of Income, to all employees
- Send a single document to a large group with a single click
- Attach search tags to contacts
- Use a dedicated support website with a user guide and training videos
- Generating a link from a template for additional uses, such as embedding the link on a website, Facebook, and more

Comsign's Signature - your Security

Comsign is a certifying agency according to EDIAS, the strictest and most advanced European standard in the world.
That means that ComSign digital certificates are valid across Europe.
